Polish-Japanese Academy of Information Technology

Polish-Japanese Academy of Information Technology (PJAiT, Polish: PJATK) was founded in 1994 as a result of cooperation between the Polish and Japanese governments. Since its early years it has been ranked among the top institutions of higher education in Poland. It is renowned among students, employers and the media.

PJAiT has been striving to refine its teaching methodology and adjust the curriculum to the ever-changing requirements of employers. Our biggest strength is practical education in the knowledge and skills useful in the job market. The fact that our graduates are among the highest-paid specialists in Poland reassures us that the choices were correct.

Our current education offer encompasses studies in computer science, graphic design, interior design, information management, and, last but not least, Japanese culture. We also run several postgraduate programmes and MBA.

The Faculty of Information Technology is an unquestionable leader on the educational market in Poland, we pay special attention to innovative solutions and new technologies. The education at this faculty consists of two parts: obligatory basic education (Programming in Java, C, C++, C#; Databases; Internet Technologies; Multimedia, etc.) and elective courses based on the specialisation chosen by students.

The unique programme of The Faculty of New Media

Arts combines the traditional graphic arts education with studying new technologies. Besides typography, photography and design for visual communication and advertising, students learn 2D and 3D animation, design for computer games, and interactive applications, as well as the deployment of VR and AR.

Interior Design is an interdisciplinary field of study which gives thorough knowledge, awareness and competence in creating man's environment by combining expertise in the area of fine arts and architecture with knowledge of modern digital media, multimedia, and visual arts.

The Faculty of Information Management offers modern engineering training programs that combine technical knowledge with management skills. Particular attention is paid to the development of practical skills in the field of business, project management, problem-solving, and decision-making.

The Faculty of Culture of Japan helps to discover the mysterious world of the Far East. Students explore current trends in popular culture - movies, comics, anime, as well as traditional culture and history. During the whole time of training an extensive study of the Japanese language is provided.

The PJAiT employs of outstanding specialists from Poland and other countries. PJAiT supports students in their research and professional interests: the academy

has scientific communities, sports clubs, as well as cyber sport teams.

The Career Development Office assists students and graduates in finding them a suitable place on the labour market. The Career Development Office cooperates with leading corporations, like IBM, Google, Dell, Displate, in order to offer students a wide range of internships and working positions in the best Polish companies.

Students of all faculties can use excellent facilities, such as modern IT and graphic design laboratories and the contemporary equipment: Google Glass, Hololens, Oculus Rift, Kinect and even Caren Extended. In cooperation with our partners, such as Microsoft, Autodesk, SAP, SAS, VMware, we offer our students free software required for classes and personal projects. Students have at their disposal: recording studio, photo studio, 3D printing laboratory, library with a reading room, canteen, publishing house and RnD center.

PJAiT students have an opportunity to learn Polish and Japanese for free during the academic year. Moreover, the intensive 30-day Polish and English courses in September are also free of charge for newcomers!

Studies in PJAiT guarantee an interesting and well-paid job in the future. They are an investment in the future professional success.

**We are located in the centre of Warsaw.
