- A student choir, orchestra and many sports clubs
- Student dormitories available
- Located in the safest capital city in Europe

Wonderful place and people

Dominika: *As an American of Polish heritage with a family tradition of dental practice, it was clear to me to pursue my dental studies at the English Dentistry Division of the Medical University of Warsaw. Passing the US National Board Dental Examination part I has certainly affirmed my choice. I can say with confidence that I gained my fundamental knowledge here. Thanks to the various medical conferences, research projects and student scientific clubs at the Medical University of Warsaw, I have developed a credible list of extracurricular interests and commitments in the field of dentistry. The small class sizes allow students to work closely with professors and doctors, and learn and gain theoretical, clinical and practical experience vital in the dental profession. I also value the importance our teachers place on training us to become well-rounded, ethical, successful, and mindful doctors. Living and studying in Warsaw for the last three years has been a pleasure, a challenge but most rewarding.*

outstanding medical professionals using modern teaching techniques in accordance with the European quality assurance standards.

MUW graduates are well equipped with the theoretical knowledge and practical skills necessary to practice medicine almost anywhere in the world.

English Division 6-year Medical Program (MD)
